

OPUS aero

12SXXXXX

OPUS aero is the new generation of spectral sensors for online measurement of nitrate and nitrite in wastewater aeration tank. By analyzing a complete spectrum, OPUS aero is able to provide reliable readings for either NO₃-N only or NO₃-N and NO₂-N, depending on the calibration.

OPUS features the new TriOS G2 interface, allowing fast and easy configuration of sensors by using

a web browser. Integration into existing process control systems and external data loggers has never been easier.

WiFi connectivity allows laptops, tablets or smartphones to be easily used for control without any special application software or app installation.

Benefits

- Without sampling and preparation of test samples
- Real-time sensor
- Without reagents
- Optical window with nano coating
- Pre-installed application calibration

Applications

- wastewater aeration tank
